more remote-viewing at ***http://www.stealthskater.com/PX.htm***

note: because important websites are frequently "here today but gone tomorrow", the following was archived from http://www.ou-research.com/ewpatents/nsaPR.html February 27, 2004. This is NOT an attempt to divert readers from the aforementioned website. Indeed, the reader should only read this back-up copy if it cannot be found at the original author's site.

NSA Project "Stargate" *(remote-viewing program)*

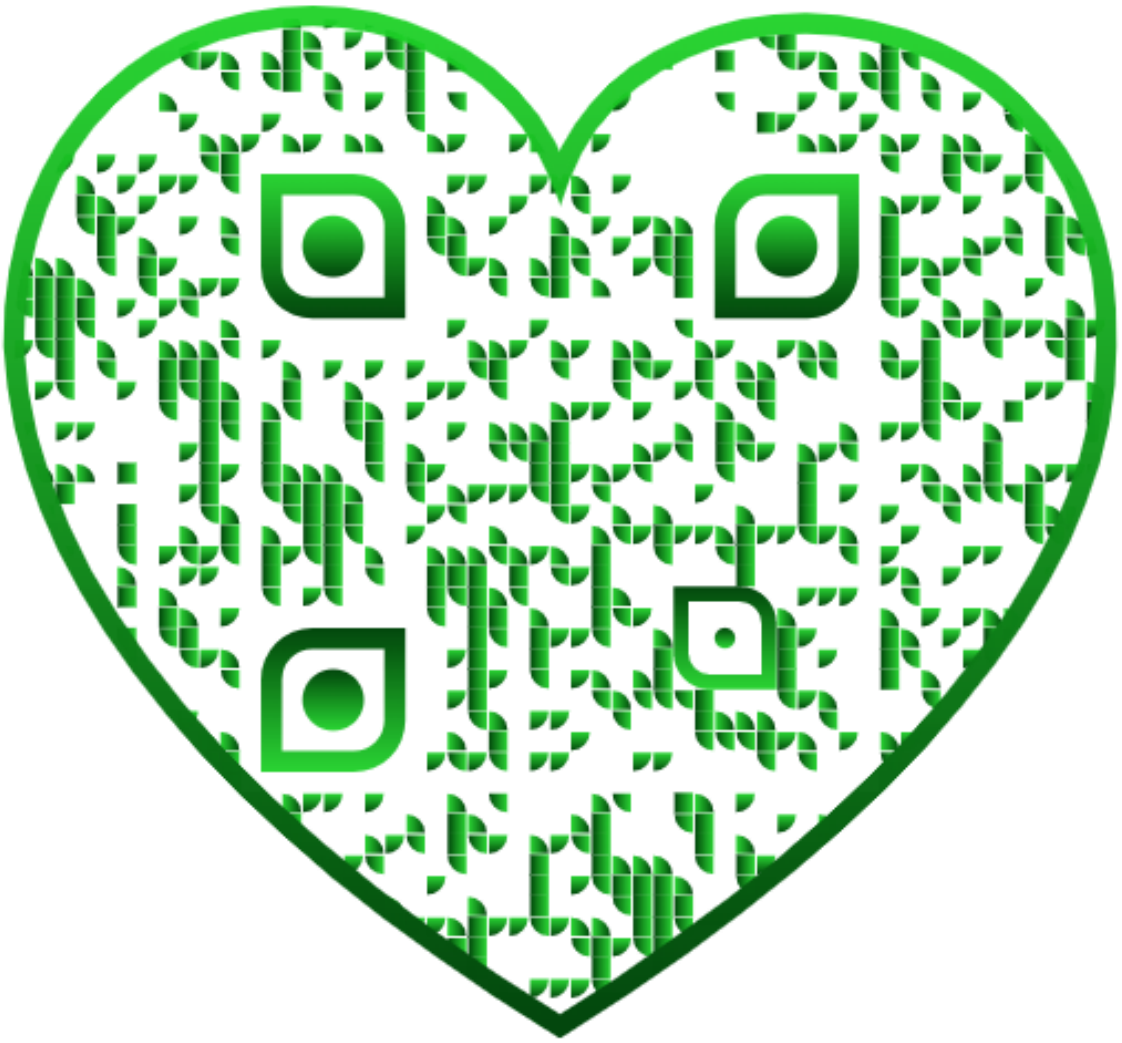
[StealthSkater note: 'StarGate' was one of the early 1970s' programs referred to by whistle-blower Army Major David Morehouse (http://www.stealthskater.com/Documents/Morehouse_1.doc). Also I have read where "sensors" are being placed in airports to detect terrorist-type thoughts inside minds. I discounted that thinking it sounded like science-fiction. Then I read the following!

This article claims that many of the UFO sightings, abduction experiences, "voices from God", and paranormal experiences are the result of advanced brainwave manipulation techniques. One of the latest twists on the famous Betty & Barney Hill UFO abduction story is that it was done by the military (screen memory implants, etc.) but using technology from -- and under the auspices of -- the ETs themselves. Researcher Martin Cannon makes a good case for these scenarios (http://www.stealthskater.com/PX.htm#MindControl)..

Bob Lazar expressed similar opinions regarding alleged alien abductions, cattle mutilations, etc. at http://www.stealthskater.com/Documents/Lazar_1.doc .]

It is interesting that the company ***Transdimensional Systems*** *mentioned in the article. Is this the same one (Transdimensions of Huntsville, Alabama - http://www.tdimension.com) that is proposing a laser-based quantum propulsion system along the same principles as UNITEL (http://www.stealthskater.com/UNITEL.htm)? (Although UNITEL's Larry Maurer was certain that his supercrystalline laser was superior to Transdimensional's dye-bsed laser, he nevertheless contacted them to see if they wanted to form a co-partnership.) Note that it could be an entirely-different company altogether. I just thought the name was an unusual coincidence. Plus the fact that the latter company has existing military-oriented products and is based at the Army/NASA Huntsville facility.]*

The U.S. Government established a remote viewing programm known as 'Stargate' in the 1970s in an attempt to utilize the skills claimed by psychics to combat Communism. Transdimensional Systems employs remote-viewers (operators). The system was changed from one of monitoring to total interception and control of individuals by the combined use of PK devices and electronic technology since 1995 by direct administration of CIA &NSA intelligence institutions.



the NSA´s mission and the NSA´s domestic intelligence operation

Communications Intelligence

Blanket coverage of all electronic communications in the U.S. and the World to ensure national security. The NSA at Ft. Meade, Maryland has had the most advanced computers in the World. NSA technology is developed and implemented in part from private corporations, academia, and the general public. DARPA is the agency engaged in R&D and collecting all the technological spin-offs useful for "military applications".

Signals Intelligence

The Signals Intelligence mission of the NSA has evolved into a program of decoding EMF waves in the environment for wirelessly tapping into computers and tracking persons with the electrical currents in their bodies. Signals Intelligence is based on the fact that everything in the environment with an electric current in it has a magnetic field around it that gives off EMF waves. The NSA/DOD has developed proprietary advanced digital equipment that can remotely analyze any objects being tele-phase or organic that has electrical or magnetic activity. (Preliminary Patent # 3,951,134) (Apparatus and Method for Remotely monitoring and altering brain Waves).

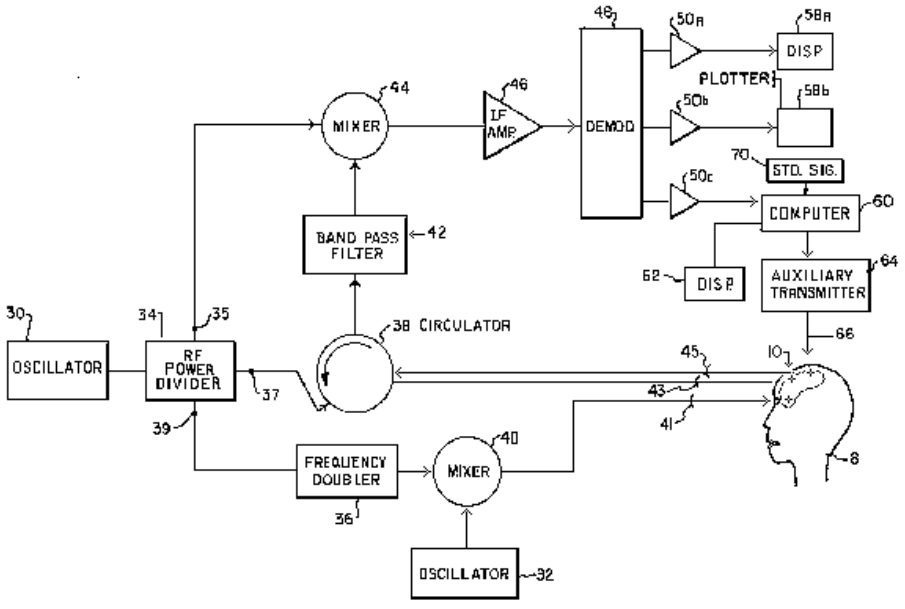
[57] **ABSTRACT**

Apparatus for and method of sensing brain waves at a position remote from a subject whereby electromagnetic signals of different frequencies are simultaneously transmitted to the brain of the subject in which the signals interfere with one another to yield a waveform which is modulated by the subject's brain waves. The interference waveform which is representative of the brain wave activity is re-transmitted by the brain to a receiver where it is demodulated and amplified. The demodulated waveform is then displayed for visual viewing and routed to a computer for further processing and analysis. The demodulated waveform also can be used to produce a compensating signal which is transmitted back to the brain to effect a desired change in electrical activity therein.

11 Claims, 2 Drawing Figures



Domestic Intelligence

The NSA has records on all U.S. citizens. The NSA gathers information on U.S. citizens who might be of interest to any of the over 150,000 NSA agents. These agents are authorized by executive order to spy on anyone. The NSA has a permanent National Security Anti-Terrorist surveillance network in place. This surveillance network is completely disguised and hidden from the public (except from Supra-Human beings) which can monitor them all the time.

Tracking individuals in the U.S. is easy and can effectively implemented with the NSA's electronic surveillance network. This network covers the entire U.S. and involves thousands of NSA personnel and tracks millions of persons simultaneously. Cost-effective implementation of operations is achieved by NSA computer technology designed to minimize operations costs.

NSA personnel serve in quasi-public positions in their communities and run "cover" and legitimate businesses that can inform the intelligence community of persons they would want to track. NSA personnel in the community usually have cover identities such as social workers, lawyers, and business owners.

Individual citizens occasionally targeted for surveillance by independently operating NSA personnel. Such contacts are made by way of individual groups or organizations witch have affinity with target interest such as religion, sex, UFO activity, and others.

NSA personnel can control the lives of hundreds of thousands of individuals in the World by using the NSA´s world security intelligence network and cover businesses. The operations -- independently run by them -- can sometimes go beyond the bounds of Law. Long-term control and sabotage of tens-of-thousands of unwilling citizens by NSA operatives is likely to happen. World Security ORG has the ability to covertly assassinate any citizens or run covert psychological control operations to cause subjects to become ill by disrupting biological **morphogenetic** fields by the use of microwave and psyotronic EW weapons.

UFO contacts, Voices from God, Spirit communication, Virgin Marry apparitions, dreams, visions are a few of the control methods used to "railroad" individuals into submission [Patent # 4,717,343 - method of changing a person's behavior].

[57] **ABSTRACT**

A method of conditioning a person's unconscious mind in order to effect a desired change in the person's behavior which does not require the services of a trained therapist. Instead the person to be treated views a program of video pictures appearing on a screen. The program as viewed by the person's unconscious mind acts to condition the person's thought patterns in a manner which alters that person's behavior in a positive way.

7 Claims, No Drawings

NSA´s domestic electronic surveillance network

As of the early 1960s, the most advanced computers in the World were at the NSA, Ft. Meade. Research breakthroughs with these computers were kept for the NSA . At the present time, the NSA has advanced technology computers that are 45 years ahead of present computer technology.

The NSA obtains blanket coverage of information in the U.S. by using advanced computers that use artificial intelligence to screen all communications (regardless of medium) for "key words" that should be brought to the attention of NSA agents/cryptologists. These computers monitor all communications at the transmitting and receiving ends. This blanket coverage of the U.S. is a result of the NSA's Signals Intelligence mission.

The NSA´s electronic surveillance network is based on a cellular arrangement of devices that can monitor the entire RF, EMF spectrum. This equipment was developed, implemented, and kept secret in the same manner as other electronic warfare programs.

Signal Intelligence Remote Computer Scanning by CPU Internal KEY and software programs

The NSA keeps track of all PCs and other computers sold in the World. This is an integral part of Worldwide and Domestic intelligence network.

The NSA´s EMF equipment can tune in RF emissions from personal computer circuit boards (while filtering out emissions from monitors and power supplies). The RF emission from PC circuit boards contains digital information on the PC. RF waves from the NSA equipment can access internal PC circuits and change data in the PC. Thus, the NSA can gain wireless access entry into any computer in the World for surveillance or counterinsurgency in an effective anti-terrorist electronic warfare implementation.

Detecting EMF Fields in Humans for Surveillance

A subject´s bioelectric field can be remotely detected. So subjects can be monitored anywhere that they are. With special EMF equipment, NSA cryptologists can remotely read evoked potentials (from EEGs). These can be decoded into a person's brain-states and thoughts.

The subject is then perfectly monitored from any distance using his unique fingerprint-like brainwave pattern.

NSA personnel can dial up any individual in the country on the Signals Intelligence EMF scanning network, and the NSA's computers will then pinpoint and track that person 24 hours-a-day. The NSA can pick out and track anyone in the U.S. or the World.

NSA Signals Intelligence Use of EMF Brain Stimulation

NSA Signals Intelligence uses EMF Brain Stimulation for Remote Neural Monitoring (RNM) and Electronic Brain Link (EBL). EMB Brain Stimulation has been in development since the MK-ULTRA program of the early 1950s that included neurological research into "radiation" (non-ionizing EMF) and bioelectric research and development. The resulting secret technology is categorized at the National Security Archives as "Radiation intelligence" defined as the "information from unintentionally emanated electromagnetic waves in environment, not including radioactivity or nuclear detonation."

(the actual codename of that project is "**Stargate**")

Signals Intelligence implemented and kept this technology secret in the same manner as other electronic warfare programs of the U.S. Government. The NSA monitors available information about this technology and withholds scientific research from the public. There are also international intelligence agreements to keep this technology secret.

The NSA has proprietary electronic equipment that analyzes electrical activity in humans from a distance. NSA computer-generated brain mapping can continuously monitor all of the electrical activity in the brain continuously. The NSA records and decodes individual brain maps (of hundreds-of-thousands of persons) for national security purposes. EMF Brain Stimulation is also secretly used by the military for mind-to-computer links.

For electronic surveillance purposes, electrical activity in the speech center of the brain can be translated into the subject's verbal thoughts. RNM can send encoded signals to the brain's auditory cortex thus allowing audio communications direct to the brain (bypassing the ears).

NSA operatives can use this to covertly debilitate subjects by simulating auditory hallucinations characteristic of paranoid schizophrenia. (Nightmares, visions, suggested ideas, voices from God, Satan, dead relatives, ETI, masters, angels, etc.)

Without any contact with the subject, Remote Neural Monitoring can map out electrical activity from the visual cortex of a subject's brain and show images from the subject's brain on a video monitor. NSA operatives see what the surveillance subject's eyes are seeing. Visual memory can also be seen. RNM can send images direct to the visual cortex, bypassing the eyes and optic nerves. NSA operatives can use this to surreptitiously put images in a surveillance subject's brain while they are in R.E.M. sleep for record-erase brain-programming purposes.

Capabilities of NSA operatives using RNM

There has been a Signals Intelligence network in the U.S. since the 1940s. The NSA, Ft. Meade has in place a vast 2-way wireless RNM system that is used to track subjects and non-invasively monitor audiovisual information in their brain. This is all done with no physical contact with the subject. RNM is the ultimate method of surveillance and domestic intelligence. Speech and 3D sound and subliminal audio can be sent to the auditory cortex of the subject's brain (bypassing the ears) and images can be sent into the visual cortex. RNM can alter a subject's perceptions, moods and motor control.

Speech cortex/auditory cortex link has become the ultimate communications system for the intelligence community. RNM allows for a complete audiovisual brain-to-computer link.

NSA Signals Intelligence Electronic Brain Link Technology

NSA SIGINT can remotely detect, identify, and monitor a person's bioelectric fields.

The NSA's Signals Intelligence has the proprietary ability to remotely and non-invasively monitors information in the human brain by digitally decoding the evoked potentials in the 30-50 Hz 5-milliwatt electromagnetic emissions from the brain.

Neuronal activity in the brain creates a shifting electrical pattern that has a shifting magnetic flux. This magnetic flux puts out a constant 30-50 Hz 5-milliwatt electromagnetic (EMF) wave. Contained in the electromagnetic emission from the brain are patterns called "evoked potentials".

Every thought, reaction, motor command, auditory event, and visual image in the brain has a corresponding "evoked potential" or net of "evoked potentials". The EMF emission from the brain can be decoded into the current thoughts, images and sounds in the subject's brain.

NSA SIGINT uses EMF-transmitted Brain Stimulators as a communications system to transmit information (as well as nervous system messages) to intelligence agents and also to transmit to the brains of covert operations subjects for a non-perceptible level).

EMF Brain stimulation works by sending a completely coded and pulsed electromagnetic signal to trigger evoked potentials (events) in the brain, thereby forming sound and visual images in the brain's neural circuits. EMF Brain Stimulation can also change a person's brain-states and affect motor control.

2-way electronic Brain-Link is done by remotely monitoring neural audiovisual information while transmitting sound to the auditory cortex (bypassing the ears) and transmitting faint images to the visual cortex (bypassing the optic nerves and eyes). The images appear as floating 2-D screens in the brain.

2-way electronic Brain Link has become the ultimate communications system for CIA/NSA personnel. Remote neural monitoring (RNM - remotely monitoring bioelectric information in the human brain) has become the ultimate surveillance system. It is used by a limited number of agents in the U.S. intelligence community.

RNM requires decoding the resonance frequency of each specific brain area. That frequency is then modulated in order to impose information in that specific brain area. The frequency to which the various brain areas respond varies from 3-to-50 Hz. Only NSA Signals Intelligence modulates signals in this frequency band.

An example of EMF Brain Stimulation

Brain Area Bioelectric Resonance Frequency Information Induced Through Modulation

Motor Control Cortex 10 Hz Motor impulse coordination

Auditory Cortex 15 Hz Sound which bypasses the ears

Visual Cortex 25 Hz Images in the brain bypassing the eyes

Somatosensory Cortex 9 Hz Phantom touch sense

Thought Center 20 Hz Imposed Subconscious Thoughts

This modulated information can be put into the brain at varying intensities from subliminal to perceptible.

Each person's brain has a unique set of bioelectric resonance/entrainment frequencies. Sending audio information to a person's brain at the frequency of another person's auditory cortex would result in that audio information not being perceived.

The use of this techniques to emulate communications from divine spirits, is the perfect weapon to influence individuals into performing any task under the name of God, Allah or whatever religion or philosophical inclination it may have, control may be bring to a point any individual, may seduce, manipulate, or even neutralize an individual without thinking or meditating about the collateral damage he may inflict.

NSA Techniques and Resources

Remote monitoring/Tracking of individuals in any location or any building continuously, anywhere in the Country.

Inexpensive implementation of these operations allows for thousands of persons in every community to be spied on covertly by the NSA.

Remote RNM Devices

NSA's RNM equipment remotely reads the evoked potentials (EEGs) of the human brain for tracking individuals and can send mental images through the nervous system to affect their performance. EW weapons as Aerostats were used successfully in the Gulf War and population control in Puerto Rico, Florida, and Texas. The newest and most fearsome arsenal includes the HAARP Ionosphere Mirror System and ultra-low frequency World weather network. The use of FM, TV, cable TV, cellular phones, and the Internet for mass manipulation of the hman mind is actually in use. Samples: Patent # 05270800 (subliminal Message Generator and Ewmirror); Patent # 05041834 (Artificial Ionosphere Mirror Composed of A plasma Layer Which Can Be Tilted.)
